

SnakeGame User Manual:

To use, simply navigate your keyboard arrows in order to control the green square which is the snake and try to move it in the direction of the food which is the pink block. You can move it in the direction of the UP, DOWN, RIGHT OR LEFT. If the snake does not get the pink block the game will close or if the snake goes out of the direction of the food it will also be a game over!

*Note the game does still close if you get the food as we are still working on how to make the snake grow after getting the food.
